

4 in

4 in

45°

The diagram shows a large square with a smaller square (diamond) inscribed inside it. The vertices of the diamond are located at the midpoints of the sides of the large square. On the left side of the large square, there are two labels: '4 in' at the top and '4 in' at the bottom, indicating the side length of the large square. At the bottom-left corner of the large square, a red arc indicates an angle of 45° between the left side of the large square and the bottom-left side of the inscribed diamond.
